TOP SECRET

THE DEPUTY SECRETARY OF DEFENSE
WASHINGTON, D. C. 20301

14 August 1968

MEMORANDUM FOR Secretary of the Air Force
Chairman, Joint Chiefs of Staff
Director of Defense Research and Engineering
Assistant Secretary of Defense (Administration)
Assistant Secretary of Defense (Comptroller)
Assistant Secretary of Defense (Systems Analysis)
Director, National Reconnaissance Office
Director, Defense Intelligence Agency

SUBJECT: Reconnaissance Program (U)

Prior to making definitive FY 69 program/budget decisions or FY 70 program/budget decisions related to the drone program (e.g. TAGBOARD, 154, 147) and the U-2/SR-71 program, I should like to see a joint assessment which incorporates your respective views on these programs which I consider should be treated as a totality. I plan to use the assessment as a basic reference in making final decisions involving the Department of Defense reconnaissance activities and related EXCOM matters. ||

If appropriate, the assessment should include alternatives to the currently approved drone and U-2/SR-71 programs together with the impact of such alternatives on other elements of our over-all reconnaissance effort. Points of agreement and disagreement should be set forth clearly, as well as any differing rationale.

I request the Assistant Secretary of Defense (Administration) to establish a group chaired by a representative of his office and composed of representatives of each of the other addressees of this memorandum to complete the assessment by 1 November 1968. Please provide him with such other assistance as he may require.

SUBJECT:

25X1

REMARKS:

25X1

Don:

Your people should be aware of the study outlined in the attached paper. You will note that U-2's are mentioned but it is not clear whether this is to be restricted to SAC aircraft or is to also include IDEALIST. I discussed this with Adm. Taylor and you will note that his comments were that we should not plan any direct participation unless requested. of Mr. Bross' staff will sit in as an observer and provide us some feed back as the study progresses. I see nothing required of us at this time but we will obviously be interested in the results and any proposed actions that result from it.

JP- This is a most significant directive - will undoubtedly direct the fate of our programs. DD S&T would like to know how - goes it - think I will keep close touch with NRO people - our level.
